

NEW INDICATOR SWIFT PANEL

UTILCELL launches its new version for panel mounting of the weighing indicator and high-speed transmitter SWIFT.

+ info

The design of the SWIFT PANEL version arises after the great success of the SWIFT RAIL since its launching more than two years ago and the numerous units installed.

The SWIFT series is ideal for weighing applications in industrial processes and machinery, both static and dynamic:

- DIN rail or panel mounting
- Serial communication RS-232 and RS-485, analogue, Profibus and Profinet
- Direct weight transmission to PC/PLC
- Multi-indicator communication in the same Bus
- Applications: weighing and level measurement in tanks and silos; dosing and filling machines; crane overload control; check-weigher scales, animal weighing, multi-head, high-speed dynamic sorting scales, test machinery...

2400 readings per second!
