

MODEL 620

50kg...6000kg

New S Type load cell for weighing applications working in Tension/Compression

We introduce the new S type load cell Model 620. Constructed in nickel plated steel alloy and with IP67 protection, it expands our range of load cells for use in tension and /or compression applications. Suitable for both indoor and outdoor environments.

Its format in three different sizes and with a wide range of nominal capacities from 50kg to 6000kg, will allow the specialist to cover a wide range of weighing applications. The format of this new model is compatible with international standards, both in dimensional features, anchor metric threads, nominal capacities and nominal sensitivity of 2 mV/V.

Model 620 it's ideal for uses in:

- Weighing hoppers and aerial weighing conveyor belts.
- Asphalt and Concrete Plants.
- Force measurement in Test equipment.
- Over track weighing scales (all kind).
